world of cinema - movie tycoon. world of cinema movie tycoon download

It's the most boring game I've play. First of all, I'm fan of tycoons, strategies and simulation games. I have never disliked a tycoon game before.

But this one, it just doesn't have a clear goal. You must choose scene after scene (there are a lot of them) prep it all, but the results are the same if you did it on the auto mode, pick only the first and last scene and let it roll.

There's no fun or strategy in that. If I could, I would try to get a refund for the first time in my life. Yes, it's that bad.. Very basic, graphics and gameplay, when you consider THE MOVIES game was over ten years ago this game seems to be ten years before that, lacking in content and playability.

In making your own movies? well unless this games animation improves later on with owning a studio, forget it.

I found this game boring for the most part but might revisit it because I like the genre.

Don't waste your money hopefully a decent updated movie game will come along soon.

Summary - Plays like an old Commodore 64, text and pictures and not much action also webpages link not working.. aweful, waste of money. Status:

**\*\*\*\*\* CRAP STAIN ALERT!!\*\*\*\*\***

**Since our last review back in April 2015 something has happened to the game or developer. It does not work properly and not one patch since his release. Single german developer who we talked with when the game released, has apparently decided to take the money he made and ran or take a permanent society and fans. Either way, the only safe assumption since it sold very well, and since... critckets or farts in the wind.. is all we know.... he had a great thing, and kind of as it stands now in 11/14/2015 total garbage now. So this guy is in need of a good fonging!**

**Never even completed the English translations either. Sad again. Does anyone finish anything anymore?**

**Discalimer; The Review Crew's evaluations are based on paying close attention to forum response and activity, system demand, fun of the game genre, position of originality in respective genre, growth of the project in its current state at time of review, graphics as a whole for end user, presentation of the game and display, replayability, patch\|tweak progress, beginner friendliness & gameplay direccion, content & depth, attention to detail on small things(polish), lag and multiplayer application if applicable, badge card availability, with a minimum 8 hours of gameplay and interaction with customer base after release. We are not affliliated with any specific brand or entity or on any payroll. All views are based on positive only feedback as we are in no position to criticise anyones craft, just current states of development and progress at the time of our participation. If we offend anyone with our content, it was not us! Our review was hacked!. After the bug was fixed it seems to be working just fine. Game is fun to pass some time.**

### **Old Review -**

**Game breaking bug on day 31. Sabotage pop up that will not go away. Reloading does not solve and unable to play any further.**

Really wanted this to be a better Tycoon game. Showtime! is a better Movie Tycoon. Don't buy this one.. World of Cinema - Movie Tycoon. More than just a MOVIE TYCOON! A uuuuuuge disappointment that'll make you request a refund after five minutes of playtime.. One word: Laggy.. I really like the idea of the game, but it's still a good way off from bring a great game. There are too many negative parts within the game, such as being robbed, shot at and losing a lot of health for not paying \$6,000,000 to the mafia, then losing 28 million in a fire at the studio caused by the mafia anyway, are ridiculous, along with losing 12 million at the casino and never winning one of the hollywood races! Anytime i get near \$100 million i lose half of it for the reasons above.

The marking and merchandise sections could do with some work too, i dont think the marketing even has any effect on sales

There is a function that allows you to create scenes and scenery for your films, they are too boring to even want to do, could do with sprucing that up, or even having the option to hire staff to do that for you.

A bit disappointed but still like the idea of the game. This game barely functions and is in all honesty rather boring. It has a very interesting premise: you're a director and you need to claw your way to the top of the Hollywood hierarchy, but it doesn't deliver. I've only played for a short time but in that short time, it has become obvious that the gameplay is repetitive, unexciting and dull. Your money is better spent on Video Game Tycoon or another more interactive tycoon game.. The idea is solid, the execution... not so much.

Making movies sounds cool, except you can't really see or understand what you're doing half the time, and the things you do understand seem pretty bad. Making the poster comes off like something from a 3rd grade art project and when I tried to upload an image myself, the game crashed.

Maybe it can be fixed... but I doubt it.

I'd stay away.
